
Alkyne-PEG2-iodide

<http://www.lumiprobe.com/p/alkyne-peg2-iodide>

Bifunctional PEG2-based crosslinker having terminal alkyne and alkyl iodide groups.

Alkyl iodides are among the most powerful alkylators. They alkylate various O-, S-, N- and C-nucleophiles. This reactive derivative can be used for the preparation of different molecules with terminal alkyne group. Terminal alkyne is a versatile synthon that participates in Sonogashira coupling and click chemistry reaction.

Structure of Alkyne-PEG2-iodide

General properties

Appearance: colorless to yellow oil

Molecular weight: 254.07

CAS number: 1234387-33-7

Molecular formula: C₇H₁₁IO₂

IUPAC name: 3-(2-(2-iodoethoxy)ethoxy)prop-1-yne

Solubility: soluble in water, polar organic solvents

Quality control: NMR ¹H, GC-MS (95%)

Storage conditions: Storage: 24 months after receipt at -20°C in the dark. Transportation: at room temperature for up to 3 weeks.

Legal statement: This Product is offered and sold for research purposes only. It has not been tested for safety and efficacy in food, drug, medical device, cosmetic, commercial or any other use. Supply does not express or imply authorization to use for any other purpose, including, without limitation, in vitro diagnostic purposes, in the manufacture of food or pharmaceutical products, in medical devices or in cosmetic products.
