ATT 565 azide

http://www.lumiprobe.com/p/atto-565-azide-6

ATT 565 is a orange-fluorescent rhodamine dye with high fluorescence quantum yield, strong thermal and photostability, and excellent water solubility. The dye is well-suited for high-resolution microscopy and single-molecule detection applications.

ATT 565 azide is a fluorescently labeled azide that reacts with alkynyl derivatives of biomolecules (terminal alkynes and cyclooctynes) via click reactions to form stable adducts.

Structure of ATT 565 azide, 6-isomer

Absorption and emission spectra of ATT 565

General properties

Appearance: dark purple-brown shiny crystals

Molecular weight: 592.70 Molecular formula: $C_{34}H_{36}N_6O_4$

Solubility: good in water, DMF, DMSO

Quality control: NMR ¹H and HPLC-MS (95+%)

Storage conditions: 24 months after receival at -20°C in the dark. Transportation: at room temperature

for up to 3 weeks. Desiccate. Avoid prolonged exposure to light.

Legal statement: Product is offered and sold for research purposes only. Product is not tested for safety

and efficacy in food, drug, medical device, cosmetic, no express or implied authorization to use for any other purpose, including, without limitation, in vitro

diagnostic purposes, for humans or animals or for commercial purposes.

Spectral properties

Excitation/absorption maximum, nm: 554 Emission maximum, nm: 578
